

Disclosure Document for Kente Group.

THE COMMODITY FUTURES TRADING COMMISSION HAS NOT PASSED UPON THE MERITS OF PARTICIPATING IN THIS TRADING PROGRAM NOR HAS THE COMMISSION PASSED ON THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

.....

RISK DISCLOSURE STATEMENT

THE RISK OF LOSS IN FOREX TRADING CAN BE SUBSTANTIAL. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION. IN CONSIDERING WHETHER TO TRADE OR TO AUTHORIZE SOMEONE ELSE TO TRADE FOR YOU, YOU SHOULD ALSO BE AWARE OF THE FOLLOWING:

FOREX TRANSACTIONS ARE NOT TRADED ON AN EXCHANGE, AND THOSE FUNDS DEPOSITED WITH THE COUNTERPARTY FOR FOREX TRANSACTIONS MAY NOT RECEIVE THE SAME PROTECTIONS AS FUNDS USED TO MARGIN OR GUARANTEE EXCHANGE-TRADED FUTURES AND OPTIONS CONTRACTS. IF THE COUNTERPARTY BECOMES INSOLVENT AND YOU HAVE A CLAIM FOR AMOUNTS DEPOSITED OR PROFITS EARNED ON TRANSACTIONS WITH THE COUNTERPARTY, YOUR CLAIM MAY NOT RECEIVE A PRIORITY. WITHOUT A PRIORITY, YOU ARE A GENERAL CREDITOR AND YOUR CLAIM WILL BE PAID, ALONG WITH THE CLAIMS OF OTHER GENERAL CREDITORS, FROM ANY MONIES STILL AVAILABLE AFTER PRIORITY CLAIMS ARE PAID. EVEN CUSTOMER FUNDS THAT THE COUNTERPARTY KEEPS SEPARATE FROM ITS OWN OPERATING FUNDS MAY NOT BE SAFE FROM THE CLAIMS OF OTHER GENERAL AND PRIORITY CREDITORS.

THE HIGH DEGREE OF LEVERAGE THAT IS OFTEN OBTAINABLE IN FOREX TRADING CAN WORK AGAINST YOU AS WELL AS FOR YOU. THE USE OF LEVERAGE CAN LEAD TO LARGE LOSSES AS WELL AS GAINS.

MANAGED ACCOUNTS MAY BE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT AND ADVISORY FEES AND THE ACCOUNT MAY NEED TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETING OR EXHAUSTING ITS ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH FEE TO BE CHARGED TO YOUR ACCOUNT BY THE ACCOUNT MANAGER. (SEE PAGE [5]).

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND SIGNIFICANT ASPECTS OF THE FOREX MARKETS. THEREFORE, YOU SHOULD CAREFULLY REVIEW THIS DISCLOSURE DOCUMENT BEFORE YOU TRADE, INCLUDING THE DESCRIPTION OF THE PRINCIPAL RISK FACTORS OF THIS INVESTMENT (SEE PAGE [4]).

NATIONAL FUTURES ASSOCIATION HAS NEITHER PASSED UPON THE MERITS OF PARTICIPATING IN THIS TRADING PROGRAM NOR THE ADEQUACY OR ACCURACY OF THIS DISCLOSURE DOCUMENT.

THIS COMMODITY TRADING ADVISOR IS PROHIBITED BY LAW FROM ACCEPTING FUNDS IN THE TRADING ADVISOR'S NAME FROM A CLIENT FOR TRADING COMMODITY INTERESTS. YOU MUST PLACE ALL FUNDS FOR TRADING IN THIS TRADING PROGRAM DIRECTLY WITH A FUTURES COMMISSION MERCHANT.

COMMENCEMENT DATE OF THIS DOCUMENT

This document is effective on or after Aug 1 2009

PRINCIPALS

1. Franklyn Abraham

BUSINESS BACKGROUND

Kente Group was founded in January 2005 and registered on 6/24/2005 as a Limited liability company in the state of Texas, NFA ID 0394715. It had not done any client business till the date of this document. Business activity commenced on Jan 1 2009.

Franklyn Abraham, the sole principal of Kente Group was previously employed by Motorola Inc, a communications firm in Fort Worth TX from July of 1997 to January 2005. He was a senior digital design engineer in the cellular infrastructure department responsible for the design of control systems. He left the company and founded the Kente Group in January 2005 and has been self employed till present. He has traded a personal account to date, has taken the series 3, National Commodities Futures Examination. He became registered as an associated person and listed as a principal of Kente Group on 7/16/2008 , and is an associate member of the NFA as of 7/16/2008; registered with the CFTC since 7/16/2008. NFA ID 0398113. This principal had not traded another's account thus has no past performance disclosed in this document.

THE FUTURES COMMISSION MERCHANT

If participating in Kente Group's managed account program, clients must maintain an account with the futures commission merchant Forex.com.

THE INTRODUCING BROKER

Kente Group does not require clients to have their accounts introduced by any certain Introducing broker (IB). Clients are free to choose any IB affiliated with Forex.com if one will be used.

PRINCIPAL RISK FACTORS

The risk of loss in the foreign exchange markets can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition. In considering whether to trade or authorize someone else to trade for you, you should be aware of the following:

If you purchase or sell a foreign exchange option you may sustain a total loss of the initial margin funds and additional funds that you deposit with your broker to establish or maintain your position. If the market moves against your position, you could be called upon by your broker to deposit additional margin funds, on short notice, in order to maintain your position. If you do not provide the additional required funds within the prescribed time, your position may be liquidated at a loss, and you would be liable for any resulting deficit in your account.

Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example when a currency is deregulated or fixed trading bands are widened.

The placement of contingent orders by you or your trading advisor, such as a "stop-loss" or "stop-limit" orders, will not necessarily limit your losses to the intended amounts, since market conditions may make it impossible to execute such orders.

A **"spread" position** may not be less risky than a simple "long" or "short" position.

Currency trading is speculative and volatile

Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; United States and foreign political and economic events and policies; changes in national and international interest rates and inflation; currency devaluation; and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

Currency trading can be highly leveraged

The low margin deposits normally required in currency trading permit an extremely high degree leverage. Accordingly, a relatively small price movement in a contract may result in immediate and substantial losses to the investor. Like other leveraged investments, in certain markets, any trade may result in losses in excess of the amount invested.

Trading in the interbank markets differs from trading in futures or futures options in a number of ways that may create additional risks. For example, there are no limitations on daily price moves in most currency markets. In addition, the principals who deal in interbank markets are not required to continue to make markets. There have been periods during which certain participants in interbank markets have refused to quote prices for interbank trades or have quoted prices with unusually wide spreads between the price at which transactions occur.

Frequency of trading; degree of leverage used

It is impossible to predict the precise frequency with which positions will be entered and liquidated. Foreign exchange trading, due to the finite duration of contracts, the high degree of leverage that is attainable in trading those contracts, and the volatility of foreign exchange prices and markets, among other things, typically involves a much higher frequency of trading and turnover of positions than may be found in other types of investments. There is nothing in the trading methodology which necessarily precludes a high frequency of trading for accounts managed.

Safety of funds

Forex transactions are not traded on an exchange, and those funds deposited with the counterparty for forex transactions may not receive the same protections as funds used to margin or guarantee exchange traded futures and options contracts. If the counterparty becomes insolvent and you have a claim for amounts deposited or profits earned on transactions with the counterparty, your claim may not receive a priority. Without a priority, you are a general creditor and your claim will be paid, along with the claims of other general creditors from any monies still available after priority claims are paid. Even customer funds that the counterparty keeps separate from its own operating funds may not be safe from the claims of other general and priority creditors. In the event of counterparty default, the client may lose the entirety of their funds.

THE TRADING PROGRAM

This trading program is based on short-term swing trades in the spot currency markets only. Trades will primarily be in the EUR/USD and will be restricted to the six major currencies which include USD, EUR, GBP, JPY, CHF, and AUD. Trading strategy is adjusted as the market changes. There are no other trading restrictions or limitations on this trading. The futures commission merchant shall carry managed accounts, and all offsetting positions shall be closed out on a first in first out basis.

FEES

Forex.com currently charges a two to fourteen pip spread for each round term trade depending on the currency pair traded. These spreads are not fixed, and fluctuate with news or other high/low volume conditions. Refer to their website for the most current spreads.

For managed accounts, Kente trade will charge a monthly performance fee based on an increase in the value of the client's commodity interest account.

The increase is calculated as the difference in equity between the current month's cutoff date and that of the previous month, adjusted for deposits and withdrawals. The cutoff date is the last calendar day of the month. This equity gain does include open positions and unrealized gain, and is the net gain after broker spreads and swap are deducted. Equity as used to determine fees is calculated as the total amount of cash and the amount of unrealized profits in your open positions minus the losses in your open positions.

The fee charged will be 30% of a positive equity increase. This increase is calculated on a high watermark basis described in an example below. Fees commence in the first calendar month regardless of account size.

HIGH WATER MARK CALCULATION:

The profit is calculated as the amount over the high water mark. For example, you deposit \$5,000 in your brokerage account, and the profit fee is set at 30%. At the end of the first month, the balance on the account is \$6,000. The first month's payment to Kente Group is \$300 (30% of \$1000) -- \$5,000 was the high watermark. Your beginning balance for the second month becomes \$5,700 (\$6,000 - \$300) and this becomes the new high water mark. On the second month, the ending balance on the account is \$5,600. No fee is paid to Kente Group, the high water mark remains \$5,700. We have to exceed that to generate a fee. This example assumes that there were no new deposits (which increase the high water mark) or new withdrawals (which decrease the high water mark).

ADDITIONAL DISCLOSURES FOR PARTIALLY-FUNDED ACCOUNTS

Kente Group does not accept partial funding. There is no minimum or maximum deposit imposed on clients except the minimum allowed by the FCM to open a mini account. Cash additions, cash withdrawals and net performance will affect the account size based on the high watermark calculation described in “fees” above. Available margin and leverage will dictate number of contracts to be traded according to our money management plan.

CONFLICTS OF INTEREST

(i) Kente Group LLC;

Kente Group receives a performance fee based on equity increase as described in “fees” above. This arrangement may present the tendency to take more risky positions than normal to attain higher fees from increased equity. Kente Group is also an introducing broker to Forex.com and receives a rebate for every round term trade, thus the incentive exists to overtrade a clients account.

(ii) Forex.com;

This is the FCM clients are required to open an account with; they charge a round term fee per contract traded described in “fees” above. See www.Forex.com for more details. This may encourage overtrading to generate these fees, but the FCM has no influence on this trading program,

(iii) Franklyn Abraham, principal of Kente Group.

This advisor trades for its own proprietary accounts, it is possible that orders of the advisor could compete for execution with the orders of other customers. There is therefore, a potential that orders executed by a particular dealing center chosen by the client, could receive better or worse price fills than orders executed for and by the advisor for its own proprietary accounts, but all accounts in this case are controlled in a master account thus mitigating this conflict.

LITIGATION

There are no material administrative, civil or criminal actions, within five years preceding the date of this document, against any of the following persons;

- (i) Kente Group and any principal thereof;
- (ii) Forex.com and any principals thereof.

TRADING FOR ITS OWN ACCOUNT

Kente Group and Franklyn Abraham intend to trade commodity interests for their own accounts; Clients will be permitted to inspect the records of this trading and any written policies related to such trading.

MATERIAL INFORMATION

Nothing shall relieve Kente Group from the obligation to disclose all material information to existing or prospective clients even if such information is not specifically required to be disclosed pursuant to Commission rules.

REQUIRED PERFORMANCE DISCLOSURES

NIETHER THIS TRADING ADVISOR NOR ANY OF ITS TRADING PRINCIPALS HAS PREVIOUSLY DIRECTED ANY ACCOUNTS.

Regards

Trade Team

Kente Group LLC.

I,.....have read and understood Kente trade's disclosure document.
